

Digital Battery Load Tester - 100 Amps Heavy Duty

TAGLab

Model : BAT102

- **TAGLab Battery Load Tester - 100 Amps Heavy Duty, Model : BAT102** is designed for testing wide range of Automotive, Inverter & other lead-acid batteries used for Motorcycle, Passenger Car, SUV, Tempo, Truck, Tractor, JCB, Ship etc. BAT102 Battery Load Tester is also suitable for Garage & Workshop use.
- **100 Amp Load** suitable for testing all types of 12V lead-acid batteries upto 1000 CCA (~200 Ah).

Features

- **Displays** pre-test battery voltage for record & comparison.
- **Microprocessor Controlled** testing method with no need for manual timing.
- **One Touch Test** with easy and accurate reading.
- **Automatically** turns off the load after max. 10 seconds.
- **Display-Hold** function for comfortable reading.
- **Heavy Duty Clamps** for safe & strong connection to the battery terminals.
- **Unique 4 Stage Process** for Polarity check, Pre-test voltage display, Battery load test, Charging system test, Starter motor test.
- **LED Alert** for reverse polarity connection.
- **Separate Reading** for battery load test and charging system test.

Technical Data

- **Battery Test** : 12V Lead-acid Batteries
- **System Test** : 12V Cranking / Charging System
- **Battery Capacity** : ~ 1000 CCA
- **Load Capacity** : 100 Amps
- **Display** : 3 Digit LED Digital Display
- **Feather-Touch** Push Button for Easy Use
